

saunum

Heater/climate device suitable for a public sauna or a larger steam room

saunum pro experience

Sauna Pro Experience's unique heater/climate device is ideal for creating an exceptional sauna experience in a more intensively used steam room. The large stone volume and the patented air mixing system ensure excellent steam, which is soft, long, and evenly distributed over the entire steam room. The innovative steam system mixes in cooler air, which allows you to breathe more easily and enjoy the sauna without feeling fatigued and having headaches. Using different heater settings, you can create a 5-in-1 spa solution, which allows you to transform a classic steam sauna into a sauna enriched with salt ions, a mild relaxation sauna, a humid steam sauna, and an aromatherapy sauna.

Heater/climate device suitable for
a public sauna or a larger steam room

|------------------------------------|--|
| Heater stones Ø 10–15 cm | 105–120 kg |
| Power 230 V~/400V 3N~ | 9 kW – 13 A / 12 kW – 17.39 A / 15 kW – 21.74 A |
| Power cable 3 phases | H07RN-F cable or equivalent |
| Power cable for the climate device | 5 x 1.5 mm ² , 1 phase – 3 speed levels |
| control unit | Saunum Leil or Saunum Leil mobile app |
| For an aroma sauna | Saunum sauna oil set |
| To disperse steam | Saunum Experience steam disperser |

How does Saunum's unique heater work?

Saunum's patented air mixing system captures scorching steam that has risen under the ceiling of the steam room, mixes it with the cooler air coming from the floor, and directs the soft blended steam evenly back into the steam room. This ensures a more even temperature during steaming and a more airy steam that allows you to breathe more easily. Water can be thrown on stones more often, and therefore the sauna air is more humid and the sweating is more intense. No fatigue or headache after sauna!

The patented method uses Himalayan salt balls to enrich the air with healthy salt ions that circulate through the steam onto your skin and into your respiratory tract.

An even more relaxing sauna experience is created with the aroma system that mixes ethereal sauna oil aromas with steam when used together with the climate device. It is a healthy alternative to burning aroma oil on heater stones.

Choose the power of the heater according to the volume of the steam room

For non-insulated walls (bricks, glass blocks, glass, concrete, floor tiles, etc.), a more powerful heater is required. Add 1.2 m³ to the volume of the steam room for each square meter of non-insulated wall. For example, a 10 m³ steam room with a glass door requires the power as of a 12 m³ steam room.

Smart sauna control device Saunum Leil

Saunum Leil is a new generation sauna control device that is convenient and easy to use. Leil optimises the time required for heating according to the sauna's specifics, thereby saving energy costs. Selecting one of three pre-set steam regimes lets you heat your sauna with just a few touches of a screen. **With the Saunum Leil mobile app**, you can control the sauna from wherever you are. Sauna notifications are displayed on the user's mobile phone screen.

Sensational experience

5-in-1 relaxing sauna and home spa

Try different settings and steam intensities and add your favourites in the steam selection of the control device

Classical Nordic steam sauna

Temperature 60–100 °C

Climate device speed level 1, valve open 25 %

Wet steamy sauna

Temperature 45–60 °C

Climate device speed level 2 or 3, valve open 100 %

The lower the temperature and the higher the speed of the climate device, the more steam is generated

Mild relaxing sauna

Temperature 40–55 °C

Climate device speed level 1

If you prefer a humid steamy sauna, keep the valve of the climate device at least 25 % open

Sauna enriched with salt ions

Temperature 40–100 °C

Climate device speed level 1, valve open 25 %

Put the salt balls (included) onto the tray inside the climate device. The climate device circulates healthy salt ions into the air, which mixes with the steam to the benefit of your skin and respiratory tract.

Relaxing aroma sauna

Temperature 40–90 °C

Climate device speed level 1, valve open 25 %

Replace one of the salt balls with an aroma bowl with a few drops of aroma oil and enjoy an aromatherapy experience.
